

Are your projectors a target for thieves?

Schools, training centres and educational institutions all have significant investment in audio-visual technology. Projectors are small, portable and with high re-sale value projector theft is a huge problem

Reduce the risk of vandalism and theft

Effectively protect your projectors with security cages manufactured by Top Tec. Physical security reduces the risk of vandalism and helps prevent theft. Security cages hinder potential thieves leaving insufficient time to carry out theft. Projectors are harder to vandalise and less likely to receive accidental damage.

Secure installations

Security cages installed by excel data services are the strongest most effective way of protecting your projectors. Top-Tec has the only **LPCB** (Loss Prevention Certification Board) approved projector cage in the UK. This leading patented design provides the highest level of protection currently available. Secure cages are user-friendly with adjustable panels for full projector use. Combined with secure mounting solutions such as ceiling mounts, poles, chains and girder clamps results in high-level protection.

LPCB approved universal projector cages are the only security devices in the UK to be attack tested to Loss Prevention Certification Board (LPCB) standards. Designed to LPS1214 standards with flexibility in mind, cages are available in four sizes. Security cages have fully adjustable side and base plates to accommodate the massive variation in projector design.

Lens position, cooling fans, filters, control panels and connectors can all be catered for with our versatile adjustable plates. A fully certified system is achieved when fitted in conjunction with our LPCB approved poles and lockable ceiling unit.

| Model | Dimensions |
|-----------|-----------------------|
| T-T 140/3 | 333w x 250d x 75h mm |
| T-T 140/4 | 327w x 250d x 100h mm |
| T-T 140/5 | 370w x 295d x 125h mm |
| T-T 140/6 | 411w x 345d x 150h mm |

Product Features

- UK's first LPCB and SBD approved projector security system.
- Universal design will accommodate most projector models.
- Can be ceiling or desk mounted.
- Effective obstacle and deterrent to theft.
- Moveable integral panels allow the unimpeded use of the projector.
- High quality grey finish.

Total Installation

Excel Data Services offer a complete projector security cage installation service including the installation and configuration of the projector with your existing display screen or interactive whiteboard.
